

Technical and Historical Quiz Overall Results

Scores for overall awards are calculated by multiplying the number of correct general questions (first number in parentheses) by 3 and adding the the number of correct model specific questions (second number in parentheses). Question 67 was protested for classes Q09L and Q09M (Boxster/Cayman) and is now scored correct for any answer for that class and for all classes for the overall trophies. The quiz has been rescored using a scanner and the only change is one tie-break score that did not affect the standings.
